

CLERGY STATEMENT OF MY RELIGIOUS OBJECTIONS TO THE
PFIZER, AND MODERNA mRNA COVID-19 VACCINES
BY REV. RONALD JONES D.D.
PUBLISHED ON THE WEBSITE OF THE TITUS INSTITUTE

As an ordained Christian minister who has taught the Bible for over forty years, both in full-time pastoral ministry and a non-profit Christian ministry on the Internet, it is clear to me that the Covid-19 vaccines violate God's will revealed in the Bible.

PFIZER AND MODERNA mRNA COVID-19 VACCINES:

Genesis 1:26 also teaches that God created the human body and its human immune system to function exactly as He created it. These mRNA and Viral Vector Vaccines interfere with the function of the human immune system when they insert genetic code instructions into the cell to direct it to make spike proteins. God's intent was for the DNA within a person's body in a cell nucleus to give genetic code instructions not anything outside the cell. Therefore, this process is a violation of God's will for humanity.

DOCUMENTATION FOR INTERFERENCE IN THE FUNCTION OF THE IMMUNE SYSTEM BY PFIZER AND MODERNA mRNA VACCINES:

GAVI, The Vaccine Alliance (gavi.org) produced a video entitled "There are four types of COVID-19 vaccines: here's how they work." Link is on titusinstitute.com.
(<https://www.youtube.com/watch?v=1FjIVIIcCvc>)

In this video (starts describing Covid-19 vaccines at 2:09), GAVI states, "Not all vaccines [traditional ones] are designed to introduce antigens to the body. Some work by using cells in a patient's body to produce the antigens themselves. Examples include viral vector vaccines and mRNA vaccines. In both cases, the goal is to get a short fragment of genetic code taken from the target pathogen, in this case the SARS-Cov-2 virus that causes Covid-19, into the patient's cell. By hijacking the cellular mechanisms, these kinds of vaccines mimic the way viruses normally reproduce during natural infection, but rather than creating copies of the virus, the cells only produce large amounts of antigen that then usually trigger a strong immune response."

GAVI admits that the cellular mechanisms are hijacked in order to cause the cell to produce antigens. This is an apt description of the interference the genetic code instructions produce in the cell. "Nucleic Acid Vaccines, like mRNA and DNA vaccines [Pfizer and Moderna], also involve inserting genetic code into cells, to produce antigens. But instead of using viruses to deliver the code, these vaccines take a more direct approach that involve inserting the code directly into cells, either by attaching it to a molecule or by forcing it into cells, using a 'gene gun.'"

GAVI admits that these vaccines insert genetic code into cells, to produce antigens. God designed the human immune system so that the DNA in the cell would give genetic instructions to the cell rather than genetic code instructions being inserted by human beings from outside the cell. This describes the interference the genetic code instructions produce in the cell.
